ASIS International Selects 2010 Accolades Winners

Program Recognizes Security's Most Innovative Products, Services and Solutions

ALEXANDRIA, Va. (Sept. 28, 2010) – [ASIS International](http://www.asisonline.org), the preeminent organization for security professionals worldwide, has selected its 2010 ASIS Accolades winners. ASIS Accolades is an awards competition that recognizes the security industry's most innovative new products, services, and/or solutions.

ASIS invited exhibitors at the [ASIS International 56th Annual Seminar and Exhibits](http://www.asisonline.org) to submit new technology, product, or service solutions for evaluation and judging for the annual Accolades competition. The winners will be recognized at ASIS 2010, the security industry's leading event, held Oct. 12-15 at the Dallas Convention Center in Dallas, Texas.

A team of judges representing end users and experts in security technologies evaluated more than 70 entries before selecting the top 10 winners. ASIS Accolades are solutions oriented, not product specific.

“This year's program was very competitive, as entrants continue to push the envelope in their respective disciplines,” observed Accolades Co-Chair Ron Lander, CPP. “In particular, video surveillance performance is advancing at a rapid pace, offering enhanced analytics functionality and better resolution.”

Co-Chair Howard Belfor, CPP, noted, “The continued blending of emerging technologies into readily available products and services is striking. The ubiquity of network and IP centric solutions in security is more evident than before.”

Accolades entrants have been invited to display their entrees in a special area on the Exhibits floor (Booth #4219, Hall F) and winners will be highlighted, along with other new products during the Seminar's “What's New on the Floor” session, on Tuesday, Oct. 12 at 1:45 p.m. in Ballroom C4.

-more-

The winners (with booth numbers) are:

Cisco Systems, Inc., Booth #3351

Cisco IP Interoperability Collaboration System (IPICS) 4.0

Cisco IP Interoperability Collaboration System (IPICS) 4.0 is a scalable, comprehensive solution for communications interoperability that streamlines radio dispatch operations and improves response to incidents, emergencies and facility events.

Cogent Systems, Inc., Booth #2651

MiY-ID

MiY-ID is Cogent's latest outdoor multi-purpose, multi-functional biometric access control reader. With its ground-breaking "Make it Yours" application development platform, MiY-ID can virtually interface with any PACS and government credentials such as PIV, TWIC, CAC.

Cross Match Technologies, Inc., Booth #3940

SEEK II with MOBS and Matching

SEEK II is the culmination of integrating core Cross Match technologies. Combining forensic-quality fingerprint capture, rapid dual iris scan capability and innovative facial capture technology, SEEK II is a comprehensive biometric identity management solution.

DEDICATED MICROS, Booth #821

Closed IPTV

The Closed IPTV (patent pending) SD Advanced is a completely secure IP Video security system with deterministic IP configuration; supporting multiple channels of HD IP Video, HDMI output, analog video and embedded analytics.

Firetide, Booth #3824

Firetide IVS-100 MIMO

Firetide IVS-100 MIMO is an integrated high performance wireless video surveillance solution for public safety and commercial security applications that reduces the costs and complexities of large-scale video surveillance deployments.

FLIR Systems, Inc., Booth #3632

ChromaNox Color IP Night Vision Cameras

The F-Series' ChromaNox payload gives security professionals the visual color details they need to identify people and objects, from full sunlight to starlight with no need for additional illumination.

Infinova, Booth #1447

Infinova V2216 Analog/Digital Coexistence VMS

Infinova's V2216 VMS lets IP and analog cameras and equipment coexist. Existing analog equipment remains untouched. The V2216 integrates with the present keyboard to manage the IP equipment using the already-installed analog control system.

Laipac Technology, Booth #3798

S-911 Bracelet Locator

S-911 Bracelet Locator is a wrist wearable security device with Assisted GPS technology for both outdoor and indoor tracking. It offers a powerful GPS and quad-band GSM module with voice and data communication encryption technology.

-more-

Next Level Security Systems, Inc., Booth #347

NLSS Gateway

The award-winning NLSS Gateway is a unified networked solution that correlates information from multiple subsystems — video surveillance, access control, analytics, audio and intrusion — to provide users with a comprehensive view of security operations.

Sarnoff Corporation, Booth #6009

VerifIR

Enables real-time surveillance of crowds in unstructured environments without a need for subject cooperation or knowledge. The VerifIR delivers these capabilities in a mobile, portable format that is affordable and easy to use.

Accolades winners will be recognized with an award presentation at the networking luncheon attended by more than 3,000 people on Tuesday, Oct. 12. All entrees will also be profiled in the Accolades onsite guide and searchable through the onsite product locator and will receive virtually year-round online exposure on the ASIS website.

#

ASIS International is the preeminent organization for security professionals, with more than 37,000 members worldwide. Founded in 1955, ASIS is dedicated to increasing the effectiveness and productivity of security professionals by developing educational programs and materials that address broad security interests, such as the ASIS Annual Seminar and Exhibits, as well as specific security topics. ASIS also advocates the role and value of the security management profession to business, the media, government entities and the public. By providing members and the security community with access to a full range of programs and services, and by publishing the industry's No. 1 magazine—[Security Management](#)—ASIS leads the way for advanced and improved security performance.

Note to Editors: Accolades winners and their products/solutions will be highlighted during the Seminar's "What's New on the Floor" session, on Tuesday, Oct. 12 in Ballroom C4 at 1:45 p.m. Reporters are invited to attend this session.
